

The Recovery Plan: A Novel

In *The Recovery Plan* A Novel, Keith Modena wakes up one day in his thirties on the floor of his crappy downtown Kansas City apartment wondering what the hell happened to my life? He has nothing to show for himself, except an impressive album collection, an encyclopedic knowledge of rock n roll, and a succession of bad relationships. Despite the booming economy his career is a washout. Once a college honor student with a bright future ahead of him, Keith's high hopes of a unique, successful life in a big city have somehow slipped away from him. While all his friends are married and settling down, Keith (the self-appointed rock guy) lives alone in a small apartment full of albums and hand-me-down furniture. He appears to have reached his thirties with absolutely no life-skills. He doesn't even own a pet. Through a chance meeting at his gym with an old college acquaintance of his Lou, a former college basketball player, Keith thinks he's found the recipe for his Recovery Plan. Unfortunately the recipe is more of the sex, booze and rock n roll that got him lost in the first place. Written in a raw, true style that feels like you're reading someone's diary, we follow as Keith grows from a man-child to a fully functioning adult. Many people hit setbacks in life—a break up or divorce, some career mishap or some other life-changing event. Many react by burying themselves in self-destructive behavior. Once you go down that road it's hard to stop. Keith's story is about overcoming the self-destructive Recovery he chose. Keith's is a story about transformation and finally growing up. Told in three parts—the first two parts see Keith continuing in the wrong direction into darkness, and in the third part ultimately triumphing with the help of a great therapist and the love of a single mother.
