

I Want That! : How We All Became Shoppers

Shopping has a lot in common with sex. Just about everybody does it. Some people brag about how well they do it. Some keep it a secret. And both provide ample opportunities to make foolish choices. Choosing and using objects is a primal human activity, and *I Want That!* is nothing less than a portrait of humanity as the species that shops. It explores the history of acquisition -- finding, choosing, spending -- from our amber-coveting Neolithic forebears to Renaissance nobles who outfitted themselves for power to twenty-first-century bargain hunters looking for a good buy on eBay. *I Want That!* explores the minds of shoppers in the quest to nourish and feed fantasies, to define individuality, to provide for family, and to satisfy the needs for celebration, power, and choice -- all of which lead us to malls, boutiques, websites, and superstores.
