

India Psychedelic: The Story of Rocking Generation

In the sixties and seventies India was still in a state of transformation and was trying to evolve into a self-sufficient nation. The young generation of a recently independent nation was swept off their feet by four young boys from Liverpool. The Beatles were loved by people from all over the world and their influence on rock music and popular culture in that era was immense. In India too, the young and cool were also grooving to their music. The Beatles had a huge impact on the Indians which led to the Indian pop and rock revolution. According to the author, Sidharth Bhatia, it was not the music that was important, rather the fact that Indians were ready to break away from the conventional culture and assert their own voice. Most youngsters of that era grew their hair, put on their bell bottoms and guitar. It was a journey to self-discovery and attempts to break free from age-old attitudes and values.
