

Oracle APEX Cookbook, Second Edition

In Detail Oracle Application Express (APEX) is a powerful, productive tool that helps you create modern web applications. The goal is to make everything declarative so the developer can reduce the amount of coding. With the jQuery mobile templates included, it is now also possible to create web applications for mobile devices, supporting mobile specific functionalities such as touch events. Oracle APEX Cookbook : Second Edition covers all the details of Application Express, giving you complete control over the new features. It shows you how to create web applications, while explaining you the concepts and bringing out useful tips and techniques to make learning interesting for you. In this second edition, you will learn how to modify themes and templates and how to use the new HTML5 and CSS3 features. You will also learn how to create visual effects such as tool tips and fading options. Furthermore, topics such as web services, publishing, administration, team development, and web sheets will be covered. This book will show you how to be agile in the development of your web applications by using team development, debugging, and third-party tools. After reading this book, you will be able to create feature-rich web applications in Application Express 4.2 with ease and confidence. Approach As a Cookbook, this book enables you to create APEX web applications and to implement features with immediately usable recipes that unleash the powerful functionality of Oracle APEX. Each recipe is presented as a separate, standalone entity and the reading of other, prior recipes is not required. It can be seen as a reference and a practical guide to APEX development. Who this book is for This book is aimed both at developers new to the APEX environment and at intermediate developers. More advanced developers will also gain from the information at hand. If you are new to

APEX you will find recipes to start development and if you are an experienced user you will find ways to improve your productivity and efficiency and make the most of APEX to enhance your applications. A little knowledge of PL/SQL, HTML and JavaScript is assumed.
