

A Year on Planet Alzheimer: and a little longer in Canada

Armed with a small child, several degrees in Psychology and twenty years as a paramedic, the author decides she has what it takes to take a job caring for a Canadian senior with Alzheimers Disease. This book details more than one journey. The trip across Canada is the easy one, the trip into 24/7 exhaustion and back to the Nazi occupation of Holland in someone elses mind is more challenging. Described by readers as a cross between Bridget Jones and Bill Bryson, A Year On Planet Alzheimer is almost the story of an adventure. It isnt quite a travelogue, despite being largely about places. It would be dereliction of duty to omit to pass comment on the remarkable ceiling at Vancouver Bus Station for example or the remarkable discovery that they dont turn Niagara Falls off at night. It is almost the story of a child...what happens when you tell a nine-year-old that travel broadens the mind? What does travel do to a nine-year-old mind? Not to mention living with someone who gets away with being naughty when you cant. Mainly there is life and the sheer unexpectedness of the way other people live it. Not just the snow dump but the incredulity generated by wanting to see it. It could be the story of an adventure with a few more shimmering sunsets dancing over majestic waves. There are some majestic waves, naturally, but this tale is more obsessed with meatballs. It is therefore the story of an escape.
