

The Paradigm, or Tale? of Evolution: A Christian-Scientific Research

In the book *The Paradigm, or Tale? Of Evolution*, the author, a Chemical Engineer, ex-atheist and now a Christian Pastor, presents the results of serious scientific researches on the subject of the origin of the universe and life. He demonstrates that the Millions of Years and the complexity of the subject of evolution is only a subtle and dangerous maneuver to divert the human attention from the true crucial point over the existence of the universe. He also reveals that in school, our children receive an INDOCTRINATION that makes them become atheists. As he says: Could it have been a Wise, Powerful, and Eternal being (that has always existed and will never cease to exist), who made all things that we see (and those we do not see); or was it The Nothing that never existed and therefore does not have and never had any power, nor purpose... nor anything!, that formed the whole universe from its own non-existent essence? Must Read it and Act accordingly!
